

SC4 TEX COAT

Description:

SC4 is an alcohol-based surface protection for fabrics, leather and car tops that creates a chemical and molecular barrier thanks to fluoropolymers. Its unique formula creates an unbelievable anti-static and hydrophobic effect, without being greasy and guaranteeing an “easy to clean” effect for subsequent cleaning. SC4 is free of petroleum distillates and can therefore be applied simply and at extreme temperatures, without bleaching and releasing oily substances. Its unique feature is that it resists and protects against UV rays, thus ensuring that the colour of leather and fabrics is maintained between 3-6 months, depending on the treated surface and its maintenance.

Directions for use:

spray SC4 2-3 times (100-150 ml/m²) directly and evenly on the clean and dry surface and wait until it has dried completely. To treat leather, apply the product using a microfibre cloth. Do not apply on hot surfaces or in direct sunlight. You can reapply another layer after 20 minutes in order to strengthen the effect. The product is fully activated after 7 hours.

Warning: best performances can be achieved on a clean and dry surface.

Consumption:

100-150 ml/m².

Technical Features:

Appearance and colour: slightly amber liquid

Odour: characteristic

pH: 7,0 ± 0,5

Flash point: >23°C

Relative density: 0,79 g/cm³

Solubility in water: not soluble

Solubility in oil: soluble

Storage:

Unopened and stored at room temperature away from direct sunlight.

Packaging:
